Architectural Lighting Handcrafted in Milwaukee Since 1974

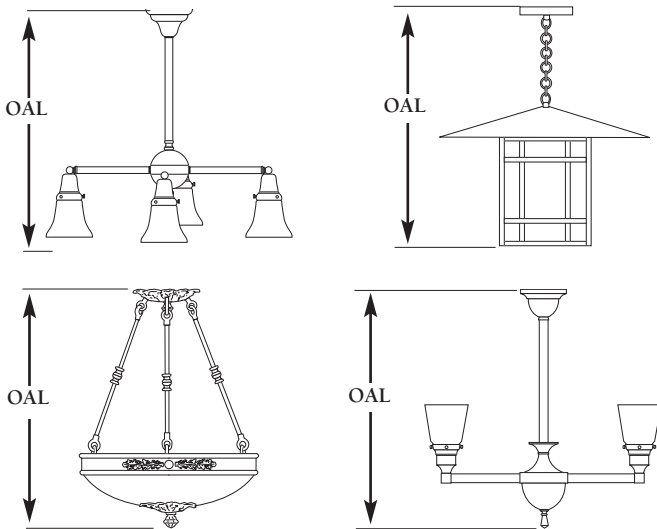

Helpful Hints

MEASUREMENT INFORMATION

Overall Length (OAL) for Variable Length Ceiling Fixtures

We measure overall length from the ceiling to the bottom of the fixture, including shade(s) when applicable. When ordering, specify the overall length in one-inch increments.

We will manufacture your fixture to the length you require using quality components for a finished and unified look. A generous amount of length is included in the base price of each fixture. If you require an overall length for a fixture that exceeds the measurement shown in the price list, there is a charge of **\$5 per inch** for the additional length.

Determining Overall Lengths Over Tables and Islands

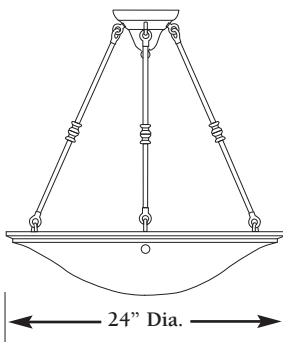

Choosing the correct fixture length over a table or kitchen island is not an exact science. Variables such as ceiling height, table or island dimensions, size and type of fixture, and personal preference can all affect the length best suited for your needs. Generally, we recommend the following:

Tables: The bottom of the fixture should hang approximately 60" - 66" above the floor.

Islands: The bottom of the fixture should hang approximately 68" - 76" above the floor.

Alabaster Bowl Diameter

Many of our alabaster bowl styles are available in a variety of sizes. We measure overall bowl diameter to the outer edge of each bowl.

Choosing an Alabaster Bowl Diameter for Over a Table

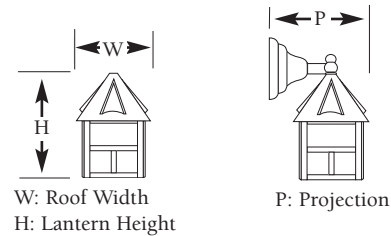

We typically recommend choosing an alabaster bowl with a diameter between 18" and 24" for your dining room. For breakfast nooks and other small spaces consider choosing a bowl between 15" and 19" in diameter.

Selecting Alabaster Pendants for Hallways and Foyers

For narrower residential hallways with an 8' ceiling, a 12" diameter bowl is often appropriate. For wider hallways and single-story foyers consider using bowls that are 15" - 19" in diameter. For larger spaces such as two story foyers, 24" - 36" diameter bowls should be used.

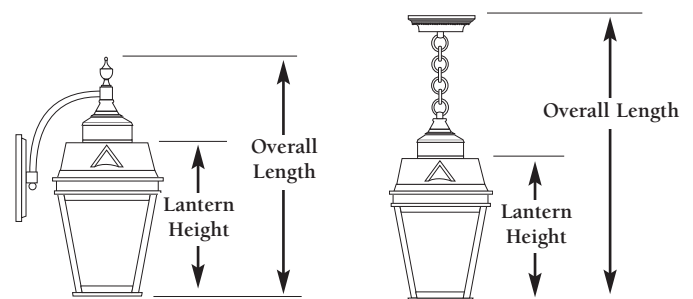

Lantern Measurements

Many lantern fixtures from the Prairie Arts and Classic Exteriors collection are available in a variety of sizes. We provide measurements for both the roof width (W) and lantern height (H). When appropriate, we also include projection (P).

Choosing the Scale of Your Lantern

Selecting the correct lantern size for the space it will occupy is an important aesthetic detail. If you're unsure of the scale of the lantern that you will need, cut a lantern outline out of cardboard to the size you think will be appropriate and position in the space you are considering. When deciding, be aware of the difference between lantern height and overall length.

Custom Fixture Modification

We can often modify our standard fixtures or custom manufacture new designs to meet your specific architectural design requirements. We frequently provide decorative lighting for commercial, institutional, hospitality, or large scale projects. Please contact our Sales Department with the particulars of your project and we will be happy to work with you.

SHADE INFORMATION

Shade Collection Catalog

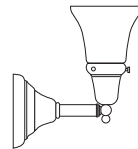

Shade choice can have a dramatic impact on the look of a fixture. We encourage you to look through our shade catalog for shade ideas to compliment your fixtures. Remember shade choice may affect fixture dimensions.

When to Specify Glass or Fabric Shade

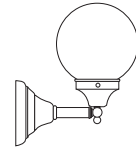

A glass shade option must be specified with the model number when ordering fixtures that have a shade holder size noted in the catalog text. For fixtures with decorative electric candles, you may specify a fabric shade option.

Matching the Fixture Shade Holder with the Glass Shade Fitter Size

A *shade holder* is the part that holds the glass shade in place on a fixture. Our wide selection of fixtures include several shade holder sizes and styles. When ordering, match the fixture shade holder size with the shade fitter size. Shade fitter sizes are noted in our Shade Collection Catalog.

EXAMPLE:
Model CN-100-A4
Broadway Wall
Sconce with the
A151 White Opal
Trumpet Shade.
(2-1/4" fitter)

EXAMPLE:
Model CN-100-A5
Broadway Wall
Sconce for Globe
with the B311 White
Opal Globe.
(3-1/4" fitter)

Shade Information continued on next page →

METAL FINISH OPTIONS

At Brass Light Gallery we consistently receive high marks from our customers for the artistry and quality of our metal finishes. From the rich luster of hand-brushed nickel to the subtle patina of authentic aged copper verdigris, we offer a diverse assortment of finish options to suit your discerning tastes. Fixture price may vary based on finish; not all fixtures are available in every finish option. Specify the Finish Option (i.e. PB, SA, VG) when ordering.

Due to the impact of environmental factors and natural aging, metal finishes on fixtures in exterior applications may change appearance over time. Slight irregularities and/or variations in finish are normal in a handcrafted product. Some variations from samples provided, previously purchased fixtures, or items shown in any printed materials is to be expected. If you have questions or concerns please call our Sales Department and we will be happy to assist you.

A complete set of metal finish and art glass samples may be ordered for \$16. Cost is refundable with purchase.

- AC Antique Copper: Waxed and hand-rubbed to a rich luster, Antique Copper is reddish-brown in hue and will slowly mellow to a classic patina.
- AR Architectural Bronze: Our Architectural Bronze finish has a deep chocolate color and a softly brushed texture.
- BB Brushed Brass: Its origin is historic, yet the bright satin tone of our Brushed Brass finish has an undeniably clean, contemporary flair.
- BK Black: A satin finish
- BN Brushed Nickel: Our Brushed Nickel's versatile satin finish is classic in traditional decors, bold in contemporary applications, and the perfect compliment to stainless steel.
- DS Distressed Brass: Our Distressed Brass wears the smoky, slightly mottled sheen of a brass chandelier tempered with years of graceful living.

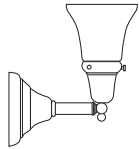

- AI Architectural Iron: Subtly rough iron texture and highlighted edges for a rustic worn look.
- PB Polished Lacquered Brass: Nothing matches the warmth and elegance of our Polished Brass. We hand lacquer the finish to preserve a long-lasting shine.
- PN Polished Nickel: The look of our Polished Nickel exudes durability and lustrous depth and compliments chrome fittings.
- PU Polished Unlacquered Brass: Hand polished with traditional methods, Polished Unlacquered Brass will slowly mature to a soft patina.
- RC Raw Copper: Our freshly plated Raw Copper initially has a vivid terra cotta color. It will mellow to a deep, rich patina.
- SA Satin Antique Brass: Our Satin Antique brass finish is caramel-brown in color with a flawless hand-brushed texture that reveals subtle gold undertones.
- SN Sandblast Steel: This gray matte finish reveals an honest, industrial character. *For Metal Frame Vintage Prismatics only.*
- ST Satin Steel: A slightly textured, brushed metallic finish. *For Metal Frame Vintage Prismatics only.*
- VG Verdigris Patina: Not to be confused with common painted faux finishes, our Verdigris Patina is the result of a meticulous, day-by-day aging process that produces an organic mix of subtle brown, green, and copper tones.

Change the Shade, Change the Look

Nothing enhances the charisma of a room like a fine light fixture with a well-chosen shade. We encourage you to look through our Shade Collection Catalog for ideas to change the look of your fixture with the simple change of a shade. Below are illustrations of the same Broadway Wall Sconce (CN-100-A4). The one on the left shows our A151 White Opal Trumpet shade, the one on the right displays our A160 Opal Satine Waterfall Hex shade.

FUNCTIONAL & DECORATIVE OPTIONS

Bottom Panels

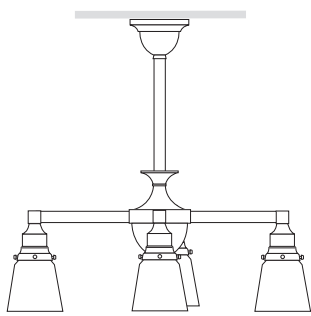

Many fixtures in our Prairie Arts and Classic Exteriors collections may be ordered with an optional bottom glass or mica panel. Specify *bottom panel* when ordering and add \$20. See catalogs for availability.

Replacement Panels

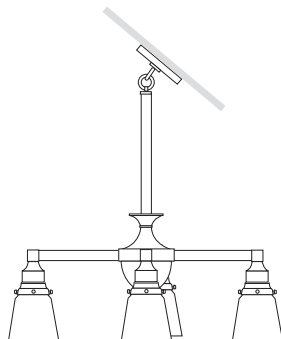

You may purchase replacement glass or mica panels for Brass Light Gallery fixtures. Please contact our Sales Department for pricing information.

Angled Ceiling Mount

Most variable length ceiling fixtures may be ordered with an optional angled ceiling mount. Specify *angled ceiling mount* and add \$55 to the fixture cost. We typically use a flat ceiling canopy that may vary from the standard fixture canopy, as shown below.

Oak Park Four Light
Glass Down

Oak Park Four Light
Glass Down Angled
Ceiling Mount

Alternate Lamping

Brass Light Gallery fixtures are designed for incandescent lamping. Many of our fixtures can accommodate screw-in, self ballasted compact fluorescent bulbs, or we can modify them for compact fluorescent lamping with electronic or magnetic ballasts. We can also provide HID lamping with remote ballast for most exterior lanterns. Call for further information.

Windowpane Shade

Our Windowpane shade is a reproduction of an Arts & Crafts original that you may specify with many of our fixtures that have a 2-1/4" shade holder. When ordering, specify shade **A110** and include both metal finish and art glass or mica choice.

Wattage Limitations on Alabaster Cup Shades

Use a maximum of a 40 watt medium base candle-style bulbs for fixtures using alabaster cup shades. Alabaster sconces and cup shades may only be used facing up.

Thumb Switch Option

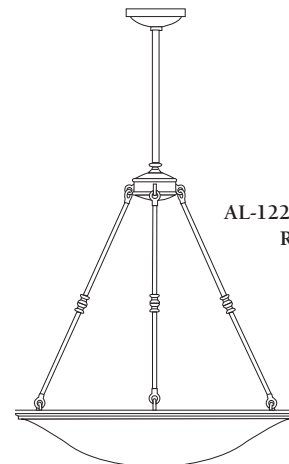

Do you have a good location for a sconce but lack a wall switch? Many of our sconces can accommodate a thumb switch. Specify *thumb switch* and add \$20 to the fixture cost. Tell us whether you plan to mount the sconce with glass facing up or down, when applicable.

Lantern Posts

Complement your post mount lanterns with matching posts in a variety of overall length options. Our 100% solid brass posts can be specified in the same high quality finish options available with our lanterns. All posts are round with 3" diameter. To order, please use a separate line and specify post model number and finish.

Multi-Rod Clusters for Longer Lengths

We add a center cluster and rod extension for multi-rod ceiling fixtures with very long lengths, as shown below. Please contact Sales for further information.

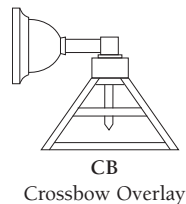

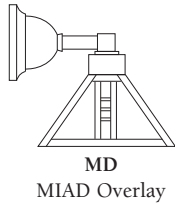

AL-1224-AA with Multi-
Rod Cluster

FUNCTIONAL & DECORATIVE OPTIONS *continued*

Overlay Options

We offer overlay design choices on many Prairie Arts and Classic Exteriors fixtures. When available, overlay options are shown in our catalogs. Specify the desired overlay option when ordering. See overlay examples below.

Finial Options

Several fixtures, such as the London Lantern, Market Light, and Wheaton sconce include a decorative finial option with the model number. Please specify when ordering.

London Lantern options include the Onion (**2E**) finial at no additional cost, or the premium Classical Acorn (**2D**) finial (**\$85**).

The Market Light Landscape Fixture includes the Round Ball (**1D**) finial. For the premium Smooth Acorn (**1E**) or Rondelle (**1G**) finials, specify the option and add **\$15**. For premium Flora (**1J**), Chateau (**1F**), or Royal Harvest (**1H**) finials, specify the option and add **\$27**.

Our Sutter Chandelier from the Prairie Arts Collection has the option of multiple decorative figures. When ordering this chandelier, include the Figure Option (i.e. Buffalo- **8B**; Bear - **2C**; Eagle - **9B**) for each figure requested.

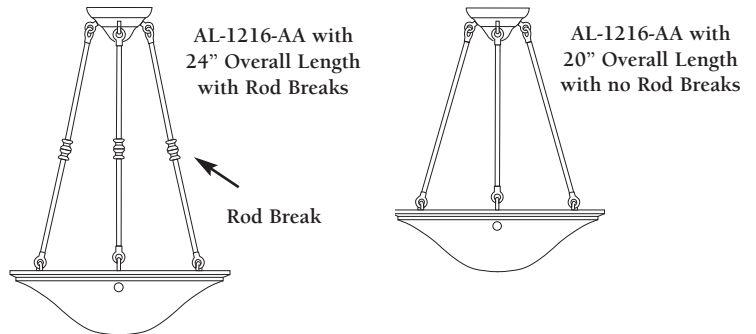

Multi-Socket Clusters

Dress up your lantern with our multi-socket lamp cluster option. Each lamp cluster is constructed of high quality, long-lasting components and finished to match your fixture. We will add either a two-socket or three-socket cluster, depending on lantern style and size. To determine the cluster used on your lantern, see the "Optional Socket Cluster/Wattage" column on the charts in the Classic Exteriors catalog. This decorative option is not available with all lanterns and is included at no charge with our larger London Lantern and French Country Lanterns.

Specify *cluster* and add **\$55** for lanterns using a two-socket cluster, **\$95** for lanterns using three-socket cluster.

Decorative Rod Breaks on Multi-Rod Alabaster Pendants

When ordering multi-rod alabaster ceiling pendants with an overall length of 21" or longer we include decorative center rod breaks, as shown below left. All multi-rod pendants with an overall length shorter than 21" are made without center rod breaks, as shown below right. If you wish to have your fixture made otherwise, please let us know when ordering. We will be happy to accommodate your request.

ART GLASS/MICA OPTIONS

Have you considered how art glass can change the look of your fixture or the mood of your surroundings? From the warm and inviting tones of Gold White Iridescent to the elegant flowing ripples of our Waterfall glass, we offer a broad palette of glass choices to meet your design needs. Specify the Glass Option (i.e. **WO**, **GW**, **SB**) when ordering.

A complete set of metal finish and art glass samples may be ordered by contacting our Customer Service Department. The price is \$10, refundable with purchase.

CL Clear Glass:	Our Clear glass is smooth like an unblemished window.
CM Cream Glass:	Our Cream art glass is a soft opaque blend of light honey and vanilla tones.
CS Clear Seeded Glass:	Tiny 'seed' bubbles give our Clear Seeded glass a vintage appearance.
DA Deep Amber Mica:	The rich tones of our Deep Amber Mica create a warm, traditional Arts & Crafts look. <i>For indoor use only.</i>
GW Gold White Glass	Our Gold White art glass is semi-opaque with an iridescent luster.

MS Moss Glass:	Our Moss art glass has a robust personality with earthy dark green and brown tones and occasional wisps of cloudy white.
NS Natural Shale Mica:	Our Natural Shale Mica has tawny hues of an autumn wheat field. <i>For indoor use only.</i>
PL Pearl Iridescent Glass:	This sophisticated white art glass is semi-transparent with a subtle pearlescent sheen.
SB Sandblast Frost Glass:	We sandblast the interior side of smooth clear glass to create a soft crystalline appearance when lit. This glass allows maximum illumination while obscuring the light source.
WF Waterfall Glass:	With gently flowing ripples like water on a windowpane, our clear Waterfall glass is reminiscent of the windows found in elegant older homes.
WO White Opal Glass:	Our White Opal art glass is an opaque milky-white color with fluid variations in texture.
